Environmental Policy

We at **Rayzon Solar Limited (RSL)** are engaged in the business of Development, Engineering, Procurement, Construction, Operations, and Maintenance of utility-scale grid-connected Solar, Wind, and Solar-Wind Hybrid power plants.

We shall conduct our business based on best-in-class industrial practices while complying with national & international standards, codes of practice, and applicable legal & other requirements. Our processes drive the sustainability of our operations and enable the fulfillment of the needs and expectations of stakeholders. Our continuous strides in the renewable sector would contribute towards a carbon-neutral energy regime that assures environmental protection and prevention of pollution.

We are committed to the domain of **Environment Management** and assure continual improvement. Our ability to protect and **conserve** the environment shall be enabled by:

- ❖ Compliance with all applicable environmental laws, regulations, and obligations, and strive to go above and beyond compliance at all project sites and operational plants. Conduct environmental due diligence and impact assessment for new or expansion of existing projects, current plant operations, and mergers and acquisitions.
- ❖ Operational controls to reduce or eliminate hazardous or non-hazardous waste, prevent pollution, and lower any other environmental impact. Protection of the environment through sustainable resource use, climate change mitigation and adaptation, and protection of biodiversity and other natural ecosystems.
- ❖ No tolerance for practices having adverse impacts on natural resources, land, flora, and fauna and triggering adverse environmental conditions.
- ❖ Sustainable practices drive the reduction, reuse, and recycling of resources and responsible approach in decisions concerning resource use, consumption, conservation, and efficiency. Adopt new technology for continual improvement of environmental practices and performance including energy efficiency.
- ❖ Education, training, and communications for creating awareness about Environmental and Social governance among employees and driving responsible environmental practices. Continually improving the environmental performance through periodic objective setting, monitoring, measurement, reporting & reviews.
- ❖ Risk-based approach involving early detection of environmental risks and facilitating the deployment of measures to mitigate the impact including climate change and natural disasters risks.
- ❖ Visible and impactful environmental initiatives driving a positive change in the communities where we operate by embedding 'Growth with goodness' in our mission of nation-building.
- ❖ Engagement of internal and external stakeholders, including employees, value chain partners, and communities for environmental and social management. Conserve and protect biodiversity in and around our project sites / operational plants in collaboration with relevant stakeholders.

This policy is approved by the Board of Directors at their meeting held on 3rd June, 2025.
